2,768 doctors call on Senator McCain to issue a full, public release of his medical records.

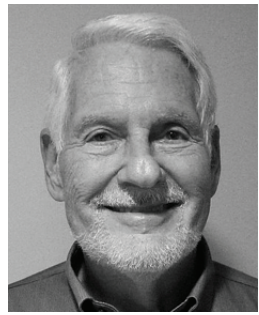

An open letter from doctors across the country:

John McCain has not yet released his medical records to the public. McCain is 72 years old, and has been diagnosed with invasive melanoma. In May of this year, a small group of selected reporters were allowed to review 1,173 pages of McCain's medical records and were allowed only three hours to do so. John McCain's health is an issue of profound importance. We call on John McCain to issue a full, public disclosure of all of his medical records, available for the media and members of the general public to review.

Rachael A. Clark, M.D., Ph.D.
Assistant Professor of Dermatology,
Harvard Medical School

"I feel it is critical that people understand how quickly and fatally melanoma can recur, sometimes with decades of remission preceding a rapid decline. I think that it is absolutely essential that Senator John McCain release his medical records in full, without restraint."

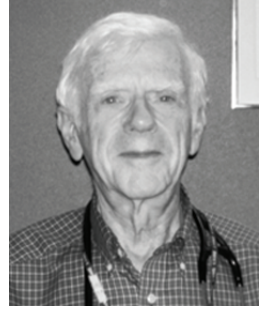

Ronald Bronow M.D.
Former Chief of Dermatology
Cedars Sinai Medical Center, Los Angeles

"Many questions about McCain's health remain unanswered - questions that speak directly to the seriousness of McCain's melanoma. If McCain's melanoma returns, the treatment alone would be severely debilitating. This is a hugely important issue and the public should know the facts."

Richard W Sagebiel M.D.
Former Director of The Melanoma Center
at the University of California, San Francisco

"CNN's Dr. Sanjay Gupta has referred to McCain's lack of candor about his medical records as 'cloak and dagger.' Allowing 20 reporters three hours each to go through 1,200 pages with no cell phones, internet access or copying machines allowed is not enough to render a serious judgment on this incredibly important matter."

Robert C. Buxbaum M.D.
Clinical Associate Professor of Medicine
Harvard Medical School

"Melanoma is a very serious illness. Full disclosure of the medical records related to McCain's melanoma is vital for Americans to understand."

Senator McCain: Issue a full, public release of your medical records. America deserves to know.
